

Let's work together to keep our system safe.

Everyone at Peoples Gas makes safety a No. 1 priority. We work hard every day to ensure our system is operating properly to safely deliver natural gas to your home or business. Did you know that while most of the system is owned and maintained by us, there are a few lines and piping on your property that you are responsible for?

We handle all the pipelines that bring natural gas down your street, into your property and into your meter. Any piping that leads from your meter to your appliances or other points of use are yours.

Sometimes these pipes are above ground and sometimes they are buried. This helpful illustration shows which lines we maintain and which ones are your responsibility.

We regularly inspect our pipelines, meters and other equipment. If we happen to see an issue with your natural gas pipes and equipment, we'll let you know, but it's a good idea to have your gas pipes inspected periodically as well. You may not realize that your pipes may be deteriorating, especially if they are buried underground.

A licensed plumbing or heating contractor can perform an inspection and any necessary repairs. For a list of service providers in your area, visit peoplesgas.com and choose *Appliance Sales and Service*.

We're here for you. If you have any questions about your natural gas service, call us at **877-TECO-PGS (877-832-6747)** and we'll be happy to help.
